

# A study of Orthotics and Walking Activity in CP

(This research study will be carried out at an off-site lab in Edmonds, WA)

Researchers at Seattle Children's are conducting a study about orthotics and walking activity in Cerebral Palsy

## Research is always voluntary!

### Would the study be a good fit for me?

This study might be a good fit for those who:

- Are 4 -9 years old.
- Have bilateral spastic Cerebral Palsy (CP).
- Walk with or without support as primary mobility

### What would happen if I took part in the study?

Those who decide to take part in the study would:

- Attend 4-8 study visits over the course of 3-6 months that may take 1-3 hours each.
- Have a gait analysis done at Orthocare Innovations Lab in Edmonds, WA.
- Wear monitors on your ankle for 2 weeks after study visits.
- Answer questions about yourself and fill out surveys.
- Study will provide free orthotics and shoes for each participant

Families who take part get \$120 after the last visit to thank them for their time and help reduce any costs associated with joining the study. Additional support is available for mileage to and from study visits at \$0.57 per mile.

To take part in this research study or for more information, please contact [Kristie.bjornson@seattlechildrens.org](mailto:Kristie.bjornson@seattlechildrens.org)

The principal researcher for this study is Dr. Kristie Bjornson, PT, PhD, MS at Seattle Children's Research Institute.
